

To whom it may concern, I have been a customer of XM satellite radio for approximately 5 months now. I became a subscriber of XM Satellite because I wanted the ability to listen to what I want, when I want it, and without commercial interruption. I was very excited when XM Satellite began to offer weather and traffic updates, as I travel a rather long distance to and from work everyday. It comes in extremely handy. As a customer who pays for this service, I feel it is my right, not the National Association of Broadcasters right, to tell me what I can and cannot listen to. I could understand being told what I had to listen to if the service was provided free, but it is not. Its like going to a restaurant and ordering steak, and they tell you how you want it, and don't care about your opinion. I am urging you as a respected member of my community to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I am asking for, and that I am paying for. Thank you for you time.

Respectfully,
N.E. Gyllensten
